Littleton, Colorado, 80126

SKILLS

- Design- Build
- Revit, Rhino, Grasshopper
- 3D printing and Laser cutting
- Hand Drawing
- Construction Practices, Structure Theories, and Building Systems
- Photography
- Adobe Photoshop, Illustrator
- Adobe Premiere, Lightroom, and LRT timelapse
- Environmentally Conscious

EDUCATION

Bachelor of Science in Architecture
The University of Colorado Denver
2019-2023
Certificate in InWorks
Certificate in Revit

High School Diploma
Valor Christian High School

2014-2018

PROFESSIONAL EXPERIENCE

Field Technician

Restoration 1 20 January 2025 - Present

- Lead mitigation projects from initial assessment through preparation for rebuilding.
- Conduct remediation processes in compliance with IICRC guidelines, ensuring structural integrity.
- Perform daily documentation including moisture/humidity readings, photographic evidence, and spatial sketches.
- Coordinate with homeowners and the General Manager to provide project updates and ensure client satisfaction.
- Supervise and mentor Field Technician Assistants to maintain workflow efficiency.

Student Assistant in the Visual Resources Center

The University of Colorado Denver 2022-2023

- Captured high-quality digital imagery of architectural drawings and models to support student portfolios.
- Filmed and documented guest lectures, exhibitions, and projects for academic archiving.
- Managed social media content and newsletters to enhance departmental visibility.

Studio II Teaching Assistant

The University of Colorado Denver 2022-2023

- Provided guidance to undergraduate students in architectural design methods, materiality, and digital tools.
- Delivered lectures and facilitated discussions on aesthetics, structures, and urban environments.
- Assisted students in refining design concepts, critiquing work, and improving digital file management.

ACADIA Convention Volunteer

The University of Colorado Denver October, 2023

- Documented architectural lectures and exhibitions through photography and videography.
- Engaged with emerging technologies and research within the field of computational architecture.

Exhibition Constructor

The University of Colorado Denver August, 2022

- Designed and constructed an interactive exhibition space showcasing university architecture projects.
- Integrated digital media, including television and soundscapes, to create a multisensory experience.
- Applied carpentry and fabrication techniques to build display frames and structural supports.

ASHTYN FRANKS

ARCHITECTURAL DESIGNER

EXPERTISE

- The past few semesters have been used to red-line and help undergraduate students, as well as help teach Rhino software, Adobe illustrator, and refining their Architecture process.
- Participated in a Bio-design course allowing me to understand newfound materials and usages in the architectural world.
- Design-build allowed me to understand the process from start to finish how something is designed and then built in the real-world.
- Design-build also allowed me to realize I want to participate in a community-engaged aspect of architecture. Reaching more out to the community and the surrounding people architects are displacing.

Architecture In the City and ACE Student Counselor

The University of Colorado Denver

Summer of 2022

- Mentored high school students exploring architecture as a career path.
- Led creative workshops and discussions on architectural impact and design thinking.

On-Site Construction

Privately hired

Summer of 2018

- Worked in teams to maneuver and lift the corrugated steel to create the exterior facade
- Learned to use different tools to fasten and cut the corrugated steel.
- Provided me with knowledge of structural supports in Residential housing and material usage
- Put me in the shoes of the people building our designs and the issues they can face

Field Technician

Restoration 1

Summer of 2018

- I would be on-call to respond and help assess and start to dry damage to the walls or beams surrounding the pipe burst, fire, or mold damage
- Assessing damage allowed the understanding of the different layered walls and materials in a household
- It taught me to understand the damage done to a house when an unexpected or catastrophic event happens
- I communicated with contractors to convey the problem and the ideal fix

Lawn Care and Window Washing

Co-Founder Mile High Window Washing

2016-2017

- As a co-founder of this company, it was my responsibility to advertise the company, reach out to clients, and consider equipment costs, the movement of equipment, and paying employees
